FEATURED PARTNERS

Our training isn't about using software, it's about **building cyclical, repeatable processes** you can scale across your org. If you're taking a "hair on fire" project management approach, you're losing time, money, and missing out on the business outcomes your initiatives should be achieving.

WORKSHOPS

TAILORED, INTERACTIVE TRAINING BASED
ON YOUR TEAM'S PROJECTS

WORKSHOPS

An on-site workshop is an interactive, immersive experience that delivers a learning environment where participants update project plans in real time.

Each workshop is customized to your team's specific strengths and gap areas.

- Which project phase is the key driver of underperformance?
- Are stakeholders over- or under-involved?
- Is ownership over tasks and timelines clearly defined?

We focus on the areas that move the needle towards overall project maturity.

INSTRUCTORS

Our instructors are business leaders first and educators second. With professional experience ranging from McKinsey to Meta to Capitol Hill, they leverage business acumen, project leadership experience, and communication expertise to help your team remove roadblocks that are in the way of project success. Other trainers can't relate - chances are, they've spent their career in the classroom, not the boardroom.

OFFERINGS

- Project Management 101 (Project Lifecycle)
- Project Management 201 (Agile)

PRICE

- 1 day training: Starting at \$15,000
- 2 day training: Starting at \$20,000

"I have taken three project management certifications from Cornell, and this training was more useful than all of them. I found the certifications to be too high level - your training was practical and applicable to the work we actually do and gave us a consistent approach to apply moving forward."

- Project Manager | 5-Star Hospitality Group

BREAKOUT SESSION

ENGAGING, HIGH-LEVEL TRAINING BUILT FOR LARGER GROUPS

Scalable solution that walks through best-practice project lifecycle to ensure consistent project approach across organization

“I had been showing my CEO project plans structured with Roman numerals, and his eyes would just glaze over. When you mentioned that detailed project plans should be hierarchical, a lightbulb went off for me. I restructured my project plan, and got better engagement and feedback from my CEO than ever before!”

- Executive, \$200M Construction Project

OFFERINGS

- The 5 Project Lifecycle Phases
- The Two PMO Models - And How to Know Which is Best For Your Organization
- Waterfall vs. Agile: Which is Best for You?

PRICE

\$5,000 per hour

SCHEDULE 15 MINUTE CONSULTATION

PMO ADVISORY

WE'LL HELP YOU SET UP, RESTRUCTURE, OR
RUN YOUR PMO

PROVEN TEAM

- Executives and project leaders who've done it (not just advised on it)

PROVEN MODEL

We enable you to:

- **Identify if you need a PMO:** Is your org at the stage of development where a PMO is necessary? If so, which model is best for you?
- **Set up a PMO:** How should this function be structured to achieve your business goals?
- **Restructure a PMO:** Where in the project lifecycle are you going off the rails?

OUTCOMES FOCUSED

Engagements geared to achieve measurable, metric-oriented results that are aligned upon ahead of time.

Common outcomes include

- **Increased efficiency**
- **Greater collaboration**
- **Shorter project cycles**
- **Fewer budget overruns**
- **Decreased attrition**

“The facilitated discussions gave me insights and ideas from my peers that I needed for the project I'm working on right now. Plus, as a cherry on top, our leadership team discussed and aligned on ways of working that we should have talked about years ago!”
